

Validate-Then-Fetch SSRF: MLflow CVE-2026-64849

MLflow CVE-2026-64849 carries a CVSS v3.1 base score of 9.3, sits in CISA's Known Exploited Vulnerabilities catalog, and was published by India's CERT-In as vulnerability note...

- 1 **Validate-then-fetch is a time-of-check-to-time-of-use bug, not a validation bug.**
- 2 **The published record names two different files, which is the whole story.**
- 3 **This is a web SSRF in a machine learning platform, not an AI vulnerability.**
- 4 **The matching test case is public and already written: OWASP WSTG v4.2, WSTG-INPV-19.**
- 5 **CERT-In published this as CIVN-2026-0416 on 20 August 2026 at Critical severity.**
